

In order to ensure successful output of files you send us, we suggest that you use this preflight checklist before submission. Conducting your own preflight check before submission can minimize delays associated with missing graphical elements, fonts and other issues.

Gabriel Group accepts files up to the following software versions:

Adobe InDesign CS5 • Quark Xpress 8.0

Adobe Illustrator CS5 • Photoshop CS5

We currently use **Xerox IGen 3 and IGen 4 digital color presses**, and we have some recommended PDF settings that will best optimize your files for these types of presses.

What we prefer:

- High Resolution PDF
- Native files including all images and fonts (Need screen fonts if used)

Preparation for files:

- Use CMYK or Pantone Coated colors **not RGB**
- Line thickness should be .25pt or greater
- Properly flattened transparencies
- Line art should be scanned at 1200 dpi or greater
- Images should be at least 300 dpi

Additional acceptable file formats:

- TIFF, EPS, JPEG (High-Res)
- Duotone images and images with clipping paths must be saved as EPS
